

## **Mock-up Review Notes**

**Nov. 15**

**Creative Director: Jin Xia**

**Designer: Tommy Fruhauf**

The system of experience and interaction works well, but we still need to work on some details of word and image to make it more visually appealing. The typeface choice needs more experiment, and the image should work well with the text. Also, navigation is still a problem to consider. Overall, we see a lot of progress in the whole system.

### **Improvements**

1. Look for more high-resolution images
2. Experiment with typeface choices (sans serif, more space between letters, lighter text)
3. Work on the navigation arrows
