Project Title: *Inception* Website

I'd like to build a multipage site for Christopher Nolan's movie *Inception*. Instead of introducing the film as an outsider, I would like to bring my potential audience into the movie, the dream Christopher creates through multiple interactions on the page.

- Home page / Introduction Real world: characters introduction
- Dream 1 (scene 1)
- Dream 2 (scene 2)
- Dream 3 (scene 3)
- Back to reality
